

Committee Request Assignment

I requested the appropriations and ways and means committees because between the two of them, they control the money. If I want my legislative agenda to get any kind of notice, it is important that I have something that I can leverage against other congressmen, and having the ability to “kill a bill in committee” allows for me to force congressmen who want support from my committee for bills that require money (most of them) to be on good terms with me and my other members.
